Projects / Open-Source

Social-Media-Platform | [Link](#)

EJS, JavaScript, CSS

This project is a comprehensive social media platform that allows users to connect, share content, and engage with each other in a dynamic online environment.

Alif_Mesjid__Web | [Link](#)

EJS, JavaScript, CSS

The AlifMosque website is a beautifully designed and user-friendly platform dedicated to serving the community by providing essential information, resources, and updates about the mosque's activities. The website offers a seamless experience for visitors, allowing them to stay connected with the mosque's events, prayer times, and services.

Real-Time-Chat-Application | [Link](#)

JavaScript, CSS, EJS

This project is a dynamic chat application that enables users to communicate in real time, featuring functionalities for both one-on-one and group conversations.

Employee-Management-System | [Link](#)

EJS, JavaScript, CSS

This project implements a comprehensive employee management system that ensures secure data handling and offers features for both admins and employees to manage and interact with employee records effectively.

futter-2024-proj-riverpod | [Link](#)

Dart, TypeScript, C++, CMake, Swift, C, HTML, JavaScript, Kotlin,
Objective-C

Quiz-App is a dynamic mobile application designed to engage both students and instructors through interactive quizzes and note-taking functionalities. The app features role-based access control, allowing instructors to create, edit, and delete questions while students can answer questions, receive instant feedback, and manage their personal notes.

Certifications

- Data Analysis Fundamentals - **Udacity**
- Networking Essentials - **Cisco**
- Full-Stack Web Development LoR - **Prodigy Info Tech**
